

Slide 1

Slide notes: In this tutorial, we look at the System Message option, which can display a Message to any number of Users when entering the Datamart where the Message is targeted.

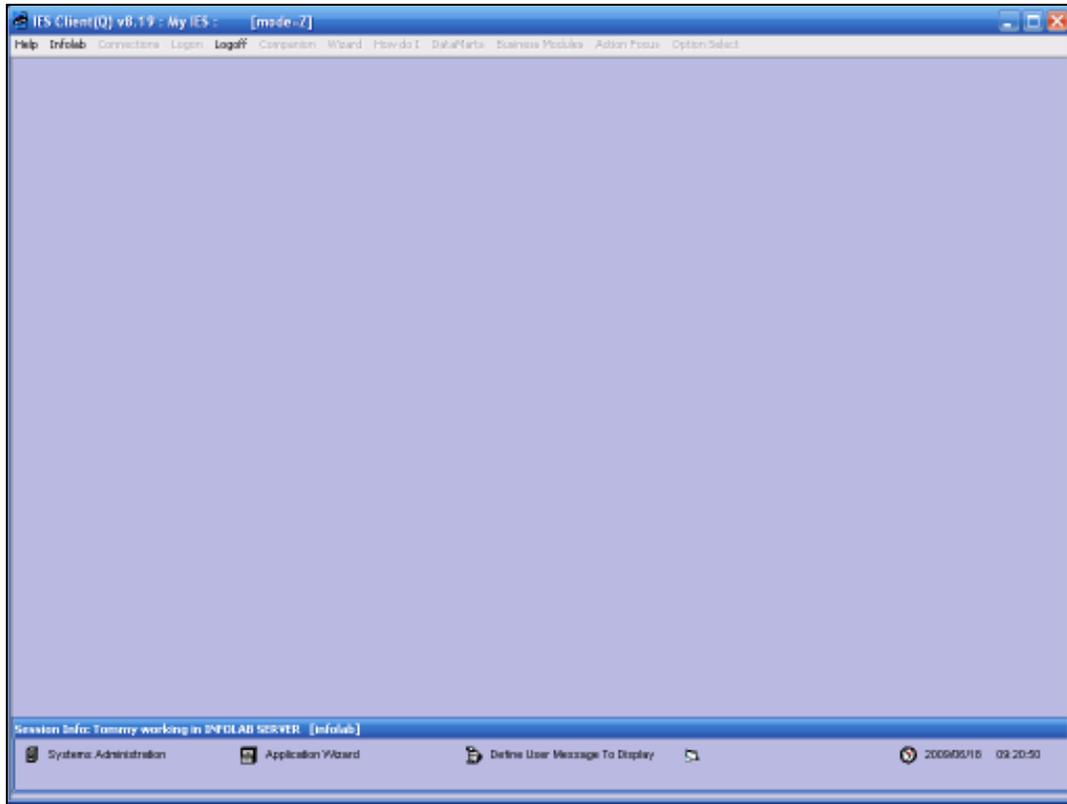

Slide 2

Slide notes: From Systems Administration we choose Global Controls, and then System Messages.

Slide 7

Slide notes: We can use any short unique Key as the Message Number.

Slide 8

Slide notes: And the system will default the active window for displaying the Message to today's date, for all Users, in the current Datamart. We can adapt the show Dates and Times if we want, and we need to capture some lookup Description to identify the Message by.

The screenshot shows a web browser window titled 'IES Client [Q] v8.1.9 : My IES : [made=Z]'. The browser's address bar is empty, and the page title is 'System Message'. The page content includes a form with the following fields and values:

Message No	01
Lookup Descr	General Message
Display Date >=	18/06/2009
Display Date <=	18/06/2009
After Time	00:00:01
Before Time	23:59:59

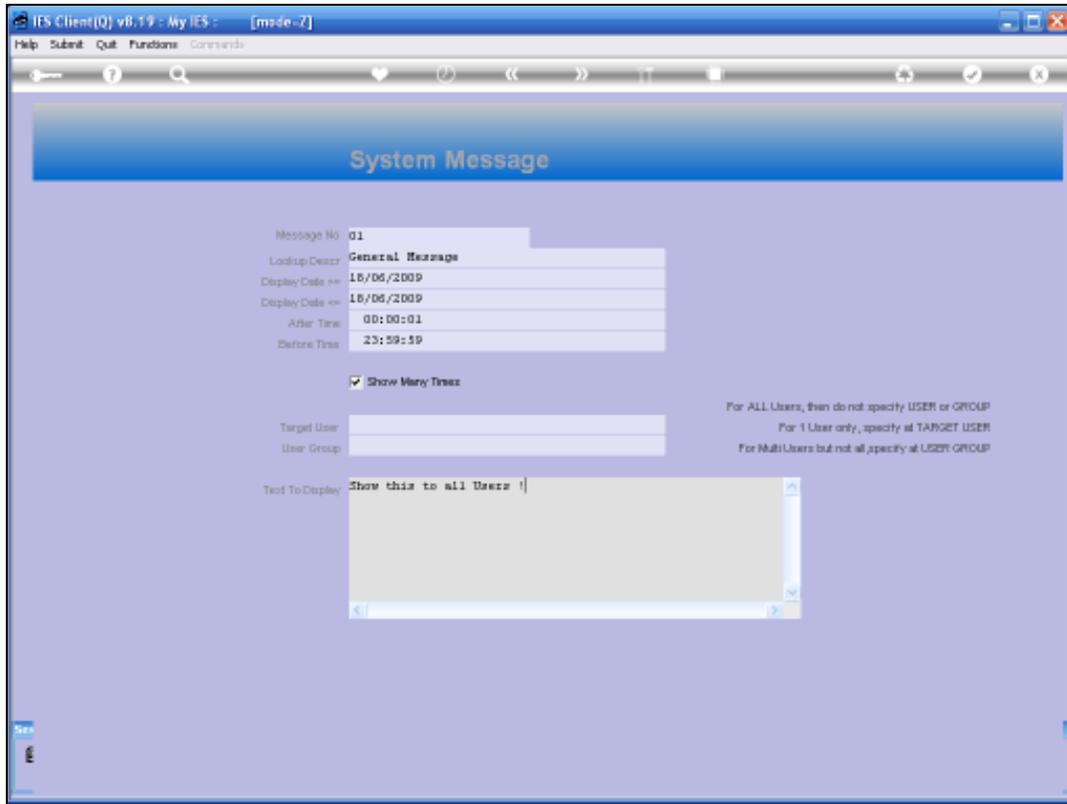

Below the table is a checkbox labeled 'Show Many Times' which is checked. To the right of the 'Target User' and 'User Group' fields, there is explanatory text:

For ALL Users, then do not specify USER or GROUP
For 1 User only, specify as TARGET USER
For Multi Users but not all, specify as USER GROUP

The 'Text To Display' field is a large text area with a scroll bar, currently empty. The browser's status bar at the bottom left shows 'Ser' and 'IE'.

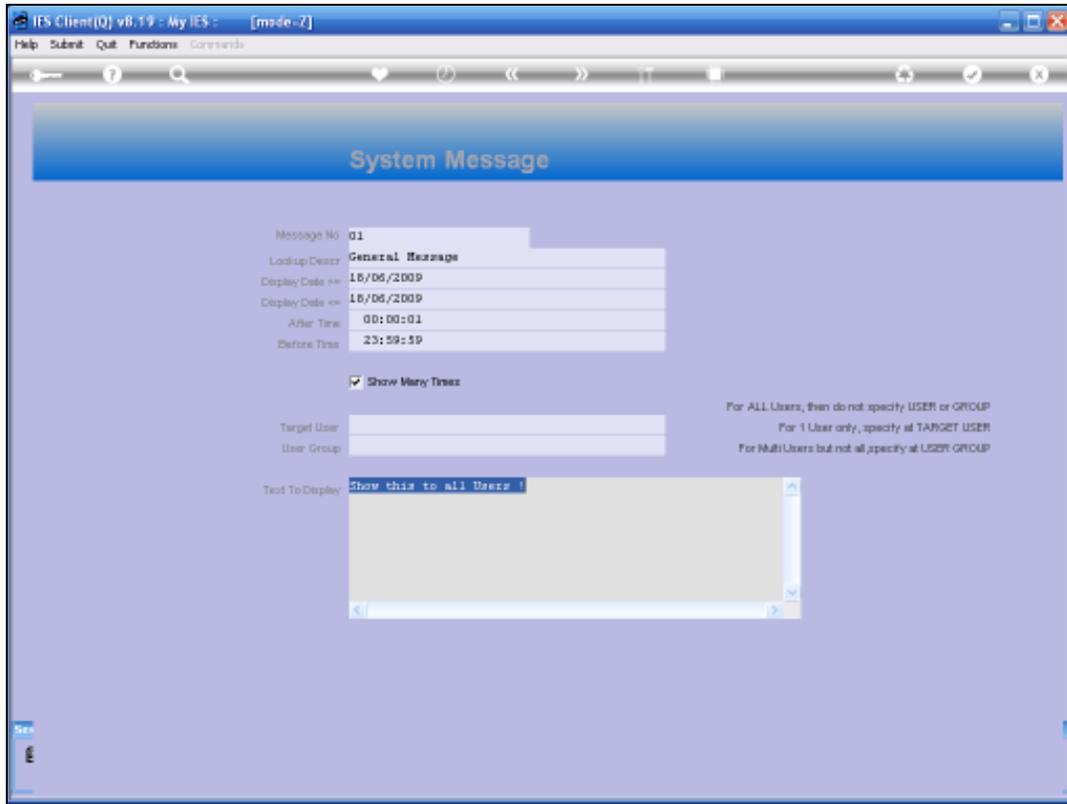

Slide 9

Slide notes: If the Message is intended for only a specific User or Group of Users, then we can specify this at the Target User or User Group fields. All that remains now is to specify the Message to be displayed, and this is captured at 'Text to Display'. The Message can be modified or deleted at any time, and once it has fulfilled its showing period, the system will automatically delete it.

Slide 11

Slide notes:

Slide 12

Slide notes: When a User, who is included in the target audience, logs to this Datamart, then the system will automatically show the Message, as can be seen here.
